

[En] > **Cone of light.**

The slow process of transformation of a tubular metal section to a slim and tapered cone, seems to attribute to the light-source the act of freezing the beam of light into a solid object. Last but not least, the varying color options, give the product an elegant and contemporary character.

[It] > **Cono di luce**

Il lento processo di trasformazione di un elemento tubolare in ferro in un cono dalla forma affusolata e snella, sembra voler attribuire alla luce l'atto di aver congelato e reso solido un fascio luminoso. L'accurata levigatezza della superficie, Infine, la svariata gamma di colorazioni, in cui è disponibile la lampada, ne conferisce un carattere elegante e contemporaneo.
